

EVERY TIME GENUINE. TURBOCHARGER

**Insist On Genuine
Cummins Parts For
Your Overhaul**

TURBOCHARGER.

A Stressful Situation.

Think about a turbocharger rotor spinning at more than 70,000 r/min, and you will quickly understand why the turbocharger is the most stressed component on your engine.

The Ultimate Balancing Act.

When a turbo is humming in perfect balance an engine can run like a dream. Add a little wobble and the dream becomes a nightmare. To say balance is important for turbochargers is a study in understatement. It's not just important, it's absolutely vital. At 70,000 r/min, wouldn't you think that anyone who dares to manufacture or remanufacture a turbocharger would do everything in their power to assure perfect balance? We agree, but our analysis of the competition proves this simply isn't the case. Several competitors 'balance' their rotor assemblies as a unit. Then they disassemble the rotors in order to assemble the rebuilt turbo. Not a good idea. As soon as they disassemble the rotor, they lose balance.

No Short Cuts.

Cummins understands that there are no short-cuts on the road to precise balance. In the Cummins ReCon remanufacturing process first the turbocharger c-wheel is balanced. Then the t-wheel is balanced. Then the t-wheel and the c-wheel are assembled in the casings and balanced again as an entire unit.

*Holset is a subsidiary of Cummins Inc.

Genuine Savings. Everytime.

Cummins ReCon turbochargers are engineered to provide maximum power and fuel economy. So when you get considerable savings with a Holset* designed turbo over a non-genuine turbo, why would you even consider anything less.

Every Feature.

- The most complete line of turbochargers for all Cummins engines
- Factory remanufactured, and precisely balanced to OEM factory specifications
- 100% Replacement of critical wear parts
- Tested in our factory for optimum reliability, durability and performance – We never use your engine to test our products
- The best warranty support from the largest and best independent service network in the world – Cummins Inc.
