

EVERY TIME GENUINE. COMPRESSOR

**Insist On Genuine
Cummins Parts For
Your Overhaul**

COMPRESSOR.

Fly First Class. Everywhere.

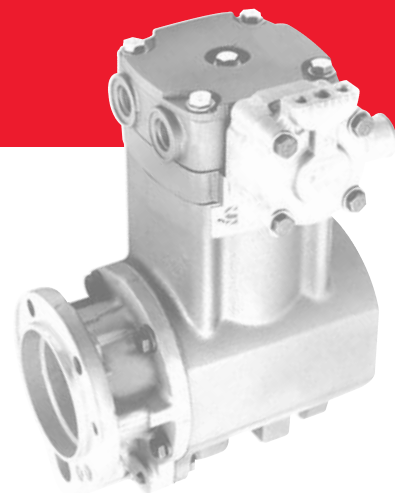

Only Cummins ReCon can guarantee that their ReCon air compressors are remanufactured to the latest Cummins specifications using only genuine Cummins parts. This is vital because some aftermarket products 'look' genuine, but service life may be shortened by inferior materials, obsolete processes and out-of-date specifications.

Remanufactured. Everytime.

Unlike many 'local rebuilders' who fix-what's-broke, Cummins ReCon air compressors are completely remanufactured in a factory environment. In fact, every Cummins ReCon air compressor is totally disassembled down to the last bolt. Any part that cannot be restored to Cummins exacting specifications is scrapped and replaced with a brand new genuine Cummins part for greater durability. All Cummins ReCon remanufactured air compressors are re-bored and all receive 100% new pistons and bushings. As an example, we automatically upgrade all of our NT aircompressors to the latest rod and head design for improved performance and durability at no additional charge.

The Best Quality.

Unlike many 'local rebuilders' who allow the customer to be the final quality check, Cummins ReCon addresses quality issues before the product leaves our doors. With our Total Quality System (TQS), Cummins ReCon incorporates Quality into every aspect of our business. This extensive program focuses on preventing quality problems at every step in the process.

Every Feature.

- The most complete line of air compressors for all Cummins engines
- 100% Replacement of critical wear parts
- 100% Factory remanufactured to Cummins precise specifications
- Tested in our factory for optimum reliability, durability and performance – We never use your engine to test our products
- No hidden core billbacks and no surprise charges – You know the total cost upfront
- The best warranty support from the largest and best independent service network in the world – Cummins Inc.
